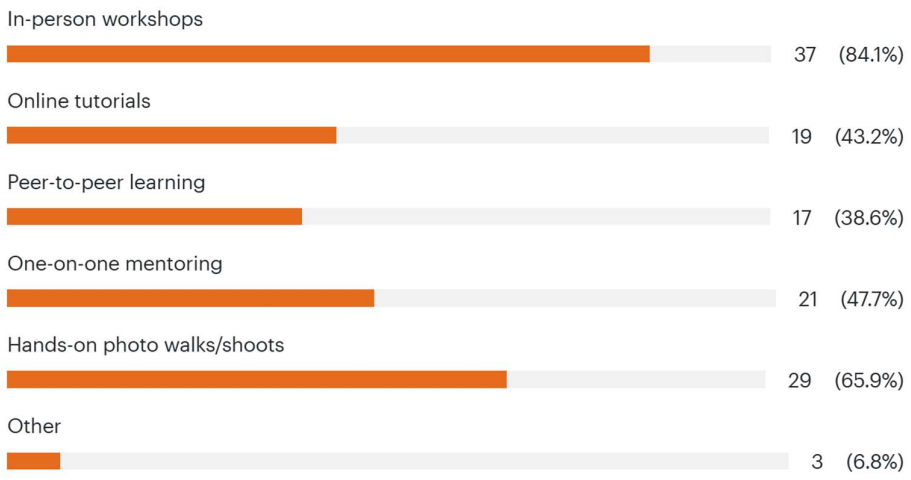
Looking for subjects, Creative Styles, Time (three responses), Getting better (two response), Creating dynamic images (two responses), How to handle AI, LR catalog, Bird photography, Camera settings, Inspiration(three responses),Editing, Getting out, exposure and sharpness, lighting in a studio, Photo organising on mac, Understanding what judges look for, composition, LR techniques, colour grading.

"6. How do you prefer to learn new skills? (Select all that apply)"



Other. Zoom sessions, field demos with camera settings, having notes about topics taught,

"7. What's one specific skill or technique you would like to master this year?"

Night photography

Panning/blurred background (several responses)

Composition (multiple responses)

Macro (several responses)

Portraits (multiple responses)

Creative photography

Sports photography

How to put a fine art photography exhibition together, either as a group or an individual

Astro and light painting

Post processing (multiple responses)

Zone focussing

Posing

Preparing images for competitions

Flash photography

Photo stacking

Improving wildlife and landscape images

How to use NiSi filters

Monochrome editing

Advanced photoshop training

Print preparation

LR catalog

Learning street scape

Farm portraiture

Seaside landscapes

Video creation and editing

AI applications

"8. Any other suggestions for future training topics?"

Alternate training with days and nights

LR training

Visit Streets printing lab

Macro

Architecture

Editing B & W images

Photoshop training

Training and Development Survey

Results Summary from Oct 2025

Arrange for a combined event/ getaway with local astronomy groups to learn and capture night sky images

Maybe a round table discussion topic: It's getting more and more difficult to ignore Artificial Intelligence in the camera club setting. I think that we could begin to learn more about it and how we can use it to our advantage. For sure it's not going to go away anytime soon. The Digital Camera, Photoshop, smartphones etc have all changed photography forever - so to is AI - where to now for Camera Clubs ?

The Boonah week end was good. Maybe we could have other weekends combined with other clubs

Model workshops

Lighting workshop

Print preparation and mounting

Many newcomers (and not so new) need to learn and start with the basics...aperture, shutter speed and ISO and the relationships between them...Photography 101

More field trips with guidance

Creating an AV presentation.

Using in camera technology like pre-shoot, multi exposure etc.

use of ND filters

Macro in nature

Portrait photography.

Mono

Video editing
